Fullstack Developer & AI-Native Software Engineer

Profile

Backend-first fullstack developer and AI-native software engineer who designs clean, testable architectures and ships end-to-end web applications using TypeScript, Node.js, and SQLite. I focus on maintainability, performance, and practical AI integration—automating workflows, enhancing user experiences, and accelerating development cycles.

Areas of Expertise

- | | | | |
|---------------------------|------------------|------------|-----------|
| • Go | • TypeScript | • PHP | • Laravel |
| • PostgreSQL | • Node.js | • SQLite | • MongoDB |
| • AI-Assisted Development | • AI-Integration | • React.js | • Next.js |

Accomplishments

- Built and shipped end-to-end web applications (frontend, backend, database, payments, third-party integrations) using TypeScript, Node.js, Go, Laravel, PostgreSQL, MongoDB and React/Next.js, emphasizing clean architecture and maintainability.
- Integrated practical AI features and AI-assisted development tools to automate workflows for system design and planning, accelerate implementation, and enhance user experiences.
- Architected secure, scalable backends and REST APIs, implemented authentication/authorization, and designed data models for client portals and dashboards.
- Improved application reliability and performance through query optimization, caching strategies, automated testing, and monitoring practices.
- Led client-facing requirements gathering and delivered iterative MVPs, translating business needs into production-ready features.
- Maintained CI/CD pipelines and automated deployments to reduce release friction and shorten delivery cycles.
- Authored technical documentation, coding standards, and onboarding guides to improve team productivity and project maintainability.

Experience

tamatopik.com, Salatiga, Jan 2026 to Present Self-employed Web Developer

Build Web Application as the digital tools that power businesses, from the user interface to the underlying logic. Architect secure databases, integrate payment systems, and develop custom features like dashboards or portals tailored to suits client's operations.

By writing clean, efficient code, I ensure every application is fast, secure, and reliable on all devices. Turn your requirements into high-performance web solutions that scale seamlessly as your business grows.

EXI GLOBAL APLIKASI ®, Salatiga, Jun 2023 to Present

Backend Developer

Build Web Application as the digital tools that power businesses, from the user interface to the underlying logic. Architect secure databases, integrate payment systems, and develop custom features like dashboards or portals tailored to suits client's operations.

By writing clean, efficient code, I ensure every application is fast, secure, and reliable on all devices. Turn your requirements into high-performance web solutions that scale seamlessly as your business grows.

EXI GLOBAL APLIKASI ®, Salatiga, Apr 2021 to Sep 2021

Frontend Web Developer

Build Web Application as the digital tools that power businesses, from the user interface to the underlying logic. Architect secure databases, integrate payment systems, and develop custom features like dashboards or portals tailored to suits client's operations.

By writing clean, efficient code, I ensure every application is fast, secure, and reliable on all devices. Turn your requirements into high-performance web solutions that scale seamlessly as your business grows.

Certifications

PostgreSQL Database Certificate, May 2024

Education

Universitas Kristen Satya Wacana, Aug 2017 to Dec 2022

Bachelor of Technology - BTech, Salatiga

Computer Science
